

The European Conference on Computer Systems (EuroSys) is a premier international forum for presenting computer systems research. EuroSys 2019 seeks papers on all areas of computer systems research, including:

- Cloud computing and datacenter systems
- Operating systems
- Distributed systems
- File, storage, and non-volatile memory systems
- Networked systems
- Language support and runtime systems
- Systems security and privacy
- Dependable systems
- Database systems and data analytics frameworks
- Virtualization and virtualized systems
- Mobile and pervasive systems
- Parallelism, concurrency, and multicore systems
- Real-time, embedded, and cyber-physical systems
- Tracing, analysis, verification, and transformation of systems

We encourage papers that span multiple topics and communities. Papers will be judged on novelty, significance, correctness, and clarity. The program committee seeks papers that address a significant

problem with an interesting and compelling solution whose validity and practicality are clearly demonstrated. A good paper will draw appropriate conclusions, honestly present related prior work, and clearly describe the new aspects of the authors' work. We welcome experience papers that clearly articulate lessons learned, as well as papers that refute prior published results.

Reviewing is double-blind, meaning that the authors' identities will be hidden from the reviewers and vice versa. EuroSys applies ACM's policies for plagiarism, submission confidentiality, reviewer anonymity, and prior and concurrent paper submission. Papers will be provisionally accepted and final acceptance will be subject to shepherding by a member of the program committee.

Full submission details will appear online on the conference Web site (<http://eurosys2019.org/>). In addition to paper presentations, EuroSys 2019 will have a poster session. Submissions for posters will open closer to the conference deadline. Accepted papers will automatically qualify for the poster session, and authors will be strongly encouraged to participate. EuroSys grants awards for the best and best student papers.

Authors who are unsure whether or not their submissions might meet these guidelines, or with specific questions about the guidelines, are welcome to contact the program committee co-chairs via pc-chairs@eurosys2019.org.

General Chair

Christof Fetzer (TU Dresden)

Program Chairs

George Candea (EPFL)

Robbert van Renesse (Cornell University)

Important Dates

Abstract Submission	September 24, 2018
Full Paper Submission	October 1, 2018
Notification to Authors	December 21, 2018
EuroSys 2019	March 26-28, 2019
